Dear Sir:

The Queens Civic Congress is an umbrella organization of ninety-two civic associations representing the two million residents of Queens County, New York City. We are writing to demand that the FAA conduct a full public review of the allocation of PFC money to pay for the construction of the NY & NJ Port Authority's Light Rail System from John F. Kennedy Airport to Jamaica, Queens.

The United States Circuit Court for the District of Columbia in the matter of *ATA v. FAA* mandated a new review. We believe the entire scope of the project needs to be examined in view of the very low projected users of this system and the fact that baggage can not be checked in at this location.

Please advise us of when and where the hearings will be conducted, because we intend to make a presentation. Thank you.

Truly yours,

Sean M. Walsh
President
